

Empowering Children with Safe Water and Education, Transforming Futures

Children in desperate need

In the hearts of countless children, immense suffering exists. They face overwhelming challenges—illness, family tragedies, poverty, crime, abuse, and the lingering impact of COVID-19. Some are homeless and lost, but we provide them with a safe haven and a sense of family. For many, education is a distant dream, and clean water is a rare luxury. Through education and vocational training, we empower these young lives, giving them the tools to overcome their circumstances. We believe in our mission to create lasting change, crafting brighter futures that will echo throughout their lives. Together, we can bring hope and transformation to these vulnerable children. Join us in making a difference.

From This Foul Water

To This Safe Water

Education and Sanitation make huge differences

These two services bring 4 times improvement for every dollar spent*. We help children enter or stay in school, educate women who can then care for their children and we provide safe clean water for their villages. Water has consistently served as a wonderful setting for people to come together, engage in meaningful conversations, and share their perspectives on life.

Nagis wrote recently saying... "We were suffering for almost one year for drinking water, especially the people like me. We had a hand well but the water level went down in this pipe. After that we used to go to our neighbour villages and used to collect water from there. We also spoke with our community leaders to help us with a hand well or a bore well.

Some of our leaders went the government office to help us. None of them helped us. Now we are so happy that we have our own bore in our village. This bore is very deep. We can have sufficient water for years from this well. This water is very clean and safe. We thank you so much for helping us."

Lives being changed

As a vibrant Christian organization, we are on a mission to help children rewrite their life stories through our dedicated local teams in three countries.

Every child deserves to feel loved, special, and capable of reaching their true potential. Through our own initiatives and partnerships with like-minded organizations, we strive to care for children in need, bridging the gap between them and compassionate supporters around the world.

In impoverished rural communities, countless children are forced to leave school early, dimming their future prospects. The challenge is immense, but our focus is on each individual child. We are passionately committed to serving these children, providing educational scholarships that empower them to chase and achieve their dreams.

Join us in making a tangible difference. Together, we

You can help

You can join with us to help bring change.

Pray - always the first thing to do

Support - through donations or child sponsorship

Come with us - consider a short term team in India. if you are interested in a short term team please contact us.

can transform lives and create brighter futures for these young souls.

Our programs are caring for orphans, children, young adults and women:

- Living in poverty
- Without access to safe water
- Whose family can't afford their education
- Young adults training as future community leaders
- Mothers who can't care for their children

Make a difference

We can't all do everything, but we can all do something

If you will sponsor a child, give for safe water or give a general gift for education or child projects, you will make a difference.
